

Aldora of Charleston has acquired the new, precision glass painting machine manufactured by Goldglass. The machine is extremely accurate and can dispense a uniform paint color throughout each piece of glass. A built-in baking process ensures paint adhesion. Aldora of Miramar can procure back painted glass through the transportation network between the two companies.

Aldora's Back Painted Glass

Features:

- Can be safety tempered prior to painting
- Virtually any paint selection including any Sherwin Williams or Benjamin Moore color
- Optical readers sense edge of glass for uniform paint application
- Paint is baked on to accelerate curing and maximize adhesion
- Single piece production or high volume throughput
- Capable of producing spandrel glass in standard and custom colors
- Lighter colors treated with back coating to minimize translucence
- 10 Year warranty on finished product
- Can be laminated for safety applications
